NORTH EAST AGRICULTURE AND FOOD PROCESSING SUMMIT 2024

Friday, 20th September 2024 | Hotel Taj Vivanta

“Agriculture Infrastructure fund”

NORTH EAST AGRICULTURE AND FOOD PROCESSING SUMMIT

The North-Eastern Region (NER) is a land of magnificent beauty, with undulating hills, rolling grasslands, cascading waterfalls, snaking rivers, terraced slopes and thrilling flora and fauna. This picturesque scenario is contrasted by widespread poverty, low per capita income, high unemployment and low agricultural productivity and food-insecurity. With more than 98 percent international border (sharing with Bhutan and China in the north, Myanmar in the east and Bangladesh in the south-west, the region has several unique features: fertile land, abundant water resources, evergreen dense forests, high and dependable rainfall, mega biodiversity and agriculture-friendly climate. There is a huge potential of the North Eastern regions in the sphere of agriculture, food processing and allied sectors like horticulture, plantation, animal husbandry and fisheries. Yet it has failed to convert its strengths optimally into growth opportunities for the wellbeing of the people.

Among many other opportunities, food processing is very popularly seen as a profitable area for investment in this region. The North-Eastern region is already an important producer of production of several crops with high export potential. But it's matter of concern that the abundant resources, gamut of crop production possibilities, and rich biodiversity have largely remained unexplored. Moreover, the traditional agricultural practices, lack of proper food processing facilities and ineffective states up port system, despite high Union Government priority, have inhibited the agricultural and food processing sector growth, resulting in a clear developmental divide between the NER and the rest of the country. This complexity needs to be understood in proper perspective and corrected.

In recent years, the central and state governments have undertaken several initiatives to stimulate regional economy and promote agricultural growth as well as food processing sector. A synergy is needed among the interdisciplinary research community, policy planners and implementers, along with civil society to create a favorable situation. It is felt that the region needs appropriate policy and investment to boost the development process. Indian Chamber of Food and Agriculture as the apex trade facilitation body and development enterprise for food and agriculture sector in India, is organizing North East Agriculture and Food Processing Summit and Expo 2024 for discussing policies and opportunities and facilitating investments and partnerships by involving important stakeholders.

The Summit will result in formulating actionable plans for industries and entrepreneurs to commit to the development of the North East in agriculture and food processing sector. It is must for everyone anyhow associated with agriculture and food processing sector via business, research, academics, startups, farming, trade, development, policy making, implementation and any other medium across the globe to participate in this very important event of North East India. The North-Eastern region has the opportunity to develop as the true gateway to the South East Asia and flourish in trade and commerce.

OBJECTIVES :

- ❖ To discuss the problems faced by farmers in North Eastern India, the issue of access and equity in technologies, trade and marketing and the challenges in food processing, agri value and supply chains.
- ❖ To discuss the policy, trade, technology, and market perspectives to agriculture and food processing on North Eastern India level for sustainable development and towards creating opportunities for farmers.
- ❖ To discuss the role of the NE States, industry and institutions towards promoting FPOs, agribusinesses, startup ventures and value chain development to help farmers with marketing and technologies.
- ❖ To discuss the issue of climate change and food security, and the need for collective action through global partnerships and the increased role of private sector in providing farmers marketing, trade and technology access to double farmers' incomes.
- ❖ To facilitate technology and investments, access to various government schemes and programs to encourage entrepreneurs and industries to create startups and put up processing infrastructure, supply and value chain development through industry linkages and partnerships.
- ❖ Enhance the competitiveness of existing individual micro-enterprises in the unorganized segment of the food processing industry and promote formalization of the sector; and to support clusters and groups such as FPOs /SHGs/Producer Cooperatives along their entire value chain through PMEFSE Scheme.
- ❖ To understand market dynamics and to boost trade and investment opportunities between both buyer and seller in the food processing industry.
